

Call for International Congress on Education Administration (ICEA2024)

We thrilled to announce you the **International Congress on Education Administration (ICEA2024)**, the traditional scientific meeting of the Association of Educational Administrators and Educational Supervisors (EYEDDER), which we will organize for the 17th time this year.

ICEA2024 is valuable in terms of providing a unique and scientific platform where knowledge and practices produced in the field of Educational Administration are shared and discussed. Especially in recent years, the increasing interest of international participants in **ICEA2024** is an important development for our field. Considering that the field of Educational Administration is closely related to universal norms as well as cultural components, it is clear that more international cooperation and interaction will be nourishing.

The main theme of **ICEA2024** is "*The field and profession of educational administration in the 100th year of the Republic*". The fact that the Republic of Turkey has left 100 years behind has undoubtedly had some important consequences for educational administration and has imposed some more important responsibilities on the field of educational administration. On the other hand, the crises in the field of education around the world make it necessary to conduct more research on "educational administration" as a profession.

ICEA2024, organized by EYEDDER, will be held on **7-9 March 2024 in Istanbul**, hosted by Istanbul Medeniyet University in cooperation with Istanbul Medeniyet University and PEGEM Publishing.

We would be honored to welcome you, our esteemed academicians, researchers, school administrators, teachers, and graduate students at **ICEA2024**.

We hope that **ICEA2024** will be a useful meeting where current problem areas of educational administration and data-based solutions will be discussed with the contributions of our national and international participants.
